ANALYST, REAL WORLD EVIDENCE & OUTCOME RESEARCH, ITALY

Company Description

Quintiles and IMS Health have come together to become IQVIA, The Human Data Science Company™ Inspired by the industry we help, IQVIA commits to providing solutions that enable life sciences companies to innovate with confidence, maximize their opportunities and ultimately drive human health outcomes forward. We provide actionable solutions by tapping into the power of the IQVIA CORE™:

• *Domain Expertise* Institutional knowledge and domain expertise across diseases, geographies and scientific methods

• *Advanced Analytics* Faster, more precise decision-making generated by advanced analytics designed for healthcare • Unparalleled Data. One of the world's largest curated healthcare data sources with innovative privacy protections

• *Transformative Technology* Leading technologies to provide real-time **access to operations-critical information**

We are currently looking for a **Health Economics Analyst** to join our **Real-World Solutions team** based in Milan.

Why Join IQVIA

Embrace your curiosity. Solve complex problems creatively. From clinical to commercial to corporate opportunities, be part of driving the next generation of healthcare powered by data, technology, and scientific expertise. Whether early in your career or experienced, be challenged and develop in a collaborative learning environment where you can have an impact on human health.

Position Description

The candidate will join our **Real-World Solutions team** and will be involved in development and delivery of **Health Economics and Outcomes Research** (HEOR) studies to help pharmaceutical companies communicate the value of their innovations to stakeholders by quantifying the economic and clinical outcomes of medical technologies.

Responsibilities

- Conducting literature review to source the required inputs to health economics analyses
- Adapting and developing health economics analyses (e.g. budget impact analyses, cost/effectiveness analyses etc.)
- Writing reports and scientific papers both in English and in Italian
- Developing and delivering presentations to clients
- Statistical analyses

Requirements

- MSc degree in Economics, Health Economics, Statistics/Biostatistics/Econometrics or any other related field with a quantitative background with strong analytical skills
- Minimum 1 year of experience. Experience in a Consulting Agency will be considered as a plus
- Excellent Microsoft Office Skills: strong skills in working with Excel spreadsheets and creating presentations with Power Point
- Proficiency in English (both written and spoken)
- Interest in the area of health economics, especially pharmaco-economics
- Fundamentals of health economics are highly preferred
- Willingness to work in a fast-changing environment
- Keenness to learn and commitment to a rapid development curve
- Ability to work in a team

Location: Milan
